		Call Date(s) Any Business Day on or after the Issue Date, subject to a 35 days' notice on the last trading day of the month.

UNDERLYING

Name	ISIN	Initial Level	Administrator
JB NextGen Circular Economy Index NTR	DE000SL0DYX0	USD 1,823.63	Solactive AG

TYPE: Swiss law governed notes.

OBJECTIVES: Tracker Certificates are financial instruments which allow you to benefit from an unlimited participation in any positive performance of the underlying. The Products reflect movements in the value of the underlying. Therefore, if the value of the underlying increases, you proportionally participate in the increase. If the value of the underlying decreases, you also proportionally participate in the decrease. Therefore, the potential loss associated with an investment in this Tracker Certificate is linked to the negative performance of the underlying and is limited to the invested amount.

FINAL REDEMPTION: Unless previously redeemed, repurchased or cancelled, on the Final Redemption of the product on the Final Redemption Date, you will receive a cash amount equal to the Final Redemption Amount which is the Denomination multiplied by the ratio of the Final Level divided by the Initial Level adjusted by applicable Fees.

The product terms also provide that if certain extraordinary events occur, adjustments may be made to the product and Julius Baer may terminate the product early. These events are specified in the product terms and principally relate to the underlyings, the product and the product manufacturer. Therefore, investors should be prepared to sustain a partial or total loss of their investments.

INTENDED RETAIL INVESTOR

The product is intended to be offered to retail investors who fulfil all of the criteria below:

- Have sufficient knowledge and experience and a comprehensive understanding of the product, its market and its specific risks, either independently or through professional advice;
- Have the ability to bear a total loss of their investment;
- Have a mid-term or long-term investment horizon;
- Seek income, expect the movement in the underlying to perform in a way that generates a favourable return;
- Are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?**RISK INDICATOR**

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to sell your product easily or may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because Julius Baer is not able to pay you.

Julius Baer has classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions are very unlikely to impact Julius Baer's capacity to pay you.

Be aware of currency risk. If the currency of your account is different to that of this product, you will be exposed to currency risk, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance, so you could lose some or all of your investment.

If Julius Baer is not able to pay you what is owed, you could lose your entire investment.

PERFORMANCE SCENARIOS

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Investment: USD 10,000		1 Year	3 Years	5 Years
Stress scenario	What you might get back after costs Average return each year	USD 1,083.16 -89.17%	USD 3,915.81 -26.84%	USD 2,809.26 -22.43%
Unfavorable scenario	What you might get back after costs Average return each year	USD 7,640.40 -23.60%	USD 6,422.15 -13.72%	USD 5,741.01 -10.51%
Moderate scenario	What you might get back after costs Average return each year	USD 10,182.55 1.83%	USD 10,496.60 1.63%	USD 10,834.20 1.62%
Favorable scenario	What you might get back after costs Average return each year	USD 13,478.56 34.79%	USD 17,039.74 19.44%	USD 20,307.26 15.22%

This table shows the money you could get for this product without a fixed term, over the next 5 years, under different scenarios, assuming that you invest USD 10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where Julius Baer may not be able to pay you.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before the end of the recommended holding period. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF JULIUS BAER IS UNABLE TO PAY OUT?

You are exposed to the risk that Julius Baer might be unable to meet its obligations in connection with the product for instance in the event of bankruptcy or an official directive for resolution action. This may materially adversely affect the value of the product and could lead to you losing some or all of your investment in the product. The product is not a deposit and as such is not covered by any deposit protection scheme.

WHAT ARE THE COSTS?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for the indicated holding period(s). They include potential early exit penalties.

The figures assume you invest USD 10,000. The figures are estimates and may change in the future.

COST OVER TIME

Investment: USD 10,000	If you cash in at the end of 1 Year	If you cash in at the end of 3 Years	If you cash in at the end of 5 Years
Total costs	USD 132.37	USD 396.73	USD 660.70
Impact on return (RIY) per year	1.32%	1.31%	1.29%

The reduction in yield shown in the above table is annualised, which means it may not be comparable to the reduction in yield values shown in other key information documents.

The costs shown in the table above represent how much the expected costs of the product would affect your return, assuming the product performs in line with the moderate performance scenario.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

COMPOSITION OF COSTS

The table below shows:

- The impact of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

The table shows the impact on return per year.

One-off costs	Entry costs	0.00%	The impact of the costs already included in the price.
	Exit costs	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Transaction costs	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	1.29%	The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance fee	-	N/A
	Carried interest	-	N/A

The costs shown in the table above represent the split of the reduction in yield shown in the costs over time table at the end of the recommended holding period. The split of the actual estimated costs per year of the product as a percentage of the investment is estimated to be as follows: entry costs: 0.00% and exit costs: 0.00%.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 5 Years

The product is held for about 5 Years on average and aims to provide you with the return described under “What is this product?” above. This period should ensure the comparability with other investment products without a fixed term.

You may exercise the product on the Put Date(s) by exercising the Holder Put Option as described above under “What is this product?”. In addition, disinvestment can only be done by selling the product either through the exchange (if the product is listed) or off-exchange, where an offer for such product exists. No fees will be charged by Julius Baer for any such transaction, however an execution fee might be chargeable by your broker if applicable. By selling the product instead of exercising it, you may receive back less.

In volatile or unusual market conditions, or in the event of technical disruptions, the sale of the product can be temporarily hindered or suspended and may not be possible at all.

HOW CAN I COMPLAIN?

Complaints about the conduct of the person advising on, or selling the product, may be submitted directly to that person or their supervisors. Complaints about the product or the conduct of the manufacturer of this product may be raised in writing to the following address: Bank Julius Baer & Co. Ltd., Hohlstrasse 604/606, P.O. Box, 8010 Zurich, Switzerland and by email to: derivatives@juliusbaer.com or via the following website: <https://derivatives.juliusbaer.com/en/home>.

OTHER RELEVANT INFORMATION

The information contained in this Key Information Document does not constitute a recommendation to enter into the product and is no substitute for individual consultation with your bank or advisor.

Any additional documentation in relation to the product, in particular, the issuance programme documentation, any supplements thereto and the product terms are available free of charge from Bank Julius Baer & Co. Ltd., Hohlstrasse 604/606, P.O. Box, 8010 Zurich, Switzerland.

The performance scenarios presented in this Key Information Document (KID) are based on a methodology, as set out in the EU Regulation 1286/2014 on Key Information Documents for Packaged Retail and Insurance-based Investment Products (PRIIPs) and its supplementing regulations. Compliance with the prescribed calculation methodology may result in unrealistic performance scenarios and values for a number of products.
